

Screening, Brief Intervention and Referral to Treatment (SBIRT)

UCLA Integrated Substance Abuse Programs (UCLA ISAP) is providing a free 4.0-hour training session on Screening, Brief Intervention, & Referral to Treatment (SBIRT) for providers working for the Sierra Nevada Memorial Hospital. Screening, brief intervention, and referral to treatment are effective in a variety of settings. Its effectiveness has been proven particularly effective in hospital emergency departments and trauma centers with individuals with alcohol-related injuries. SBIRT has also been shown to be effective in primary care settings, where it is incorporated into other routine medical assessments such as measuring blood pressure. This training focuses on screening procedures to identify risk; key motivational interviewing concepts and principles that are tied to effective use of the FLO (Feedback; Listen and Understand; Options Explored) brief intervention; and referral to treatment for patients with more serious substance use-related problems.

Saturday, February 10, 2018
8:00am-12:15pm
Sierra Nevada Memorial Hospital
155 Glasson Way
Grass Valley, CA 95945

At the conclusion of the training, participants will be able to: (1) describe the background and rationale for conducting SBIRT with consumers in mental health settings; (2) Explain how to utilize screening procedures to identify patients engaged in at-risk substance use behaviors; and (3) Demonstrate a three-step motivational interviewing-based brief intervention strategy to motivate patients to change their at-risk behavior and/or seek treatment.
